RESPONSE

Seattle, Washington 98101

October 3, 2005

TO THE COMMISSIONER FOR PATENTS:

This paper is filed in response to the Office Action mailed on July 5, 2005, under 37 C.F.R. § 1.313(b), notifying applicants of the application's withdrawal from issuance. Claims 1-20 are currently pending. Claims 1-20 stand rejected. Reconsideration of Claims 1-20 is respectfully requested.

The Rejection of Claim 20 Under 35 U.S.C. § 102(b) or 35 U.S.C. § 103(a)

Claim 20 is rejected under 35 U.S.C. § 102(b) as anticipated by or, in the alternative, under 35 U.S.C. § 103(a) as obvious over "Acetylation of Solid Wood Using Microwave Heating, Part 2. Experiments in Laboratory Scale" by Breid et al.

Applicants respectfully disagree. Claim 20 is a product-by-process claim that also recites esterified wood made from a loblolly, slash, longleaf, shortleaf, or radiata pine, wherein the claimed wood product is esterified by the recited process.

For a reference to be anticipatory, the reference must exactly describe the claimed invention. Because Breid does not describe any one of loblolly, slash, longleaf, shortleaf, or radiata pine, the reference is not anticipatory.

Applicants submit there are many species of pine, out of which, applicants recite five species in Claim 20. The scientific names for the species are provided in the application at
